Bird/Bat/Bee House Order Form.

Please: orders must be received by April 1st

Pick up on Sun April 28 9AM - Noon Gordy's Parking Lot, Downtown Chippewa Falls

Item	Description	Cost Each	Number Ordered	Total Cost
	<p>Cedar Wood Duck Houses Wood Duck houses should be mounted on a post or <u>deciduous tree</u> 6 to 8 feet high with the entrance hole facing south or west and within 30 to 100 feet from the nearest water. It is best not to put up wood duck houses within sight of each other.</p>	\$50		
Same style as the Cedar Houses	Pine Wood Duck Houses	\$25		
	<p>Pine Bat Houses The box should be placed at least 10 feet above the ground in an open area orientated south-southeast (135 degrees azimuth is optimal) where it receives at least 7 hours of direct sun.</p>	\$15		
	<p>Pine Blue Bird Houses Face the blue bird house away from the prevailing wind. 4 - 6 feet high on a post is optimal. Blue birds don't like thick vegetation near the house.</p>	\$10		
	<p>Wren Bird House Mount or hang the house 6 - 10 feet high near a tree or shrub. House wrens seem to prefer areas with trees and shrubs. Fencerows and brushy draws are ideal.</p>	\$8		
	<p>Mason Bee House Place within about 300 feet of your garden on a solid wall, fence, or post. Facing the morning sun (S or SE) at about eye-level for easy viewing. Don't give raccoons or other critters easy access to your bees. Avoid installing the bee house right next to a bird feeder or a birdhouse. Remember to keep plants trimmed for a clear bee-line to the house. <i>Limited Supply! So, order early!</i></p>	\$20

Species Description

EVERGREENS

<p>Red Pine (Pinus Resinosa) Also called Norway Pine. Fast growing lumber species. Handles adverse environment well. Grows to 75ft.</p>	<p>White Pine (Pinus Strobus) Native 5 needle pine with a variety of uses. Timber, Christmas trees, windbreaks, wildlife habitat or as an ornamental. Fast growth to 150ft.</p>
<p>Blue Spruce (Picea Pungens) Slow growing spruce bluish color varies to dark green. Very hardy. Grows to 50 feet.</p>	<p>White Spruce (Picea Glauca) Hardy northern spruce with stiff bluish green needles. Symmetric growth. Short needle length. Grows to 50 feet.</p>
<p>Blackhill Spruce (Picea Glauca Densata) Dense, bluish green foliage. Excellent screening and windbreak choice. Extremely hardy, as an ornamental it gives an alpine meadow effect. Symmetric growth, shows drought resistance. Medium growth to 20-40 feet.</p>	<p>Balsam Fir (Abies Balsamea) Soft, bright green needles. Very popular Christmas tree. Needs very little shearing. Medium growth up to 60 feet.</p>
<p>Fraser Fir (Abies Fraseri) Very popular for Christmas trees. Good needle retention and soft, shiny, bright green needles. Beautiful symmetric landscape tree. Medium growth up to 60 feet.</p>	<p>Eastern Red Cedar (Juniperus Virginiana) Dense pyramidal tree shears well, super tough ornamental or wildlife species. Small blue berry like cones are a great source of food for migrating birds. Deer will not eat this Cedar. Does well on sandy sites. Tough as heck. Wood used for cedar chest. Fast growth to 20-30feet.</p>

DECIDUOUS

<p>Red Maple (Acer Rubrum) Grows well in moist bottomland. Fire red fall foliage. Excellent choice as ornamental. Medium growth to 120 feet.</p>	<p>Sugar Maple (Acer Saccharnum) (Hard Maple) Hardy maple valued for many woodland projects. Makes a great shade tree and is valued for its syrup. Brilliant fall color. Fast growth to 70 feet.</p>
<p>River Birch (Betula Nigra) Excellent ornamental tree. Very heat and cold tolerant. Resistant to insects which plague white birch. Quickly replacing white birch as a valuable landscape tree. Exfoliating cinnamon to light cream white bark. Fast growth to 90 feet.</p>	<p>Red Osier Dogwood (Cornus Sericea) Dense growing shrub with striking red bark in winter. Clusters of beautiful white blossoms followed by purple fall berries are a major food source for migrating birds. Dark green waxy leaves. Fast growth to 9 feet.</p>

Fruit & Nut

<p>Black Walnut (Juglans Nigra) Fast growing, popular hardwood tree. Nuts are thick shelled and full flavored. Tolerates cold climates. Food for wildlife. A good shade tree and valuable lumber species. Fast growth to 80 feet.</p>	<p>American Plum (Prunus Americana) Small tree with profuse white sweet smelling flowers followed by sweet red plums and brilliant fall color. Very hardy. Benefits man and wildlife. Medium growth to 20 feet.</p>
<p>Renetka Crab (Malus Renetka) The best species of crab for vigor, productivity, disease resistance, hardiness and floral display. Dark waxy green leaves, an explosion of white flowers and a bumper crop of persistent dime size red fruit which feed a multitude of birds thru-out our long winters. Grows fast and straight. Is a must have for birders and deer plots. Fast growth to 40 feet.</p>	<p>American Hazelnut (Corylus Americana) A vigorous multi stemmed shrub, tolerant of varied soil types, dark green summer foliage turning bright yellow in fall. Interesting floret type seed packets hold sweet filberts highly prized by most wildlife including people. Grows to 10 feet.</p>
<p>Nannyberry (Viburnum Lentago) Open shrub to small tree. Creamy white bloom clusters in spring yield a plethora of food for wildlife in fall. Tolerates drought and shade. Does well on most soil types. Fast growth to 20 feet.</p>	<p>Serviceberry (Amelanchier Canadensis) Masses of white early spring flowers emerge before any trees leaf out. Edible purple fruit in mid-summer, then bright yellow to red foliage in fall. A small shrubby specimen tree. Does well in shade. Medium growth to 25 feet.</p>
<p>Silky Dogwood (Cornus Amomum) Dense growing shrub with red/maroon bark in winter. Clusters of beautiful white blossoms followed by purple fall berries. A major food source for migrating birds. Excellent browse for deer and edge planting. Dark green waxy leaves. Serves as good screening shrub, quick to establish, thick growth. Fast growth to 9 feet.</p>	<p>Ninebark (Physocarpus Oplifolius) Masses of white flowers, atop a tough adaptable shrub which produces small seeds and cover. Important to native songbirds and great deer cover. Fast growth to 5-7 feet.</p>

Large Tree and Shrubs - BareRoot

<p>White Oak (Quercus Alba) Large majestic form, valued for its water/rot proof lumber, oak wilt resistant as it will wall off the disease. Excellent acorn production. Preferred by wildlife as it lacks the tannins found in acorns of the black oak family. Medium growth to 80 feet.</p>	<p>Arborvitae (Thuja Occidentalis) (White Cedar) Native to eastern U.S. and Canada. Excellent for screens, windbreaks and wildlife habitat. Does well in poorly drained sites. Wood from cedar does not rot making it preferred for outdoor construction. Fast growth to 35 feet.</p>
<p>White Birch (Betula Papyrifera) ornamental of all native birches. Chalk white bark peels in papery layers. Golden fall color. Fast growth to 80 feet.</p>	<p>Most</p>
