Across from Ace Hardware

Native Tree and Shrub Descriptions

<p>Blackhill Spruce (<i>Picea Glauca Densata</i>) Dense, bluish green foliage. Excellent screening and windbreak choice. Extremely hardy, as an ornamental it gives an alpine meadow effect. Symmetric growth, shows drought resistance. Medium growth to 20-40 feet.</p>	<p>Colorado Blue Spruce (<i>Picea Pungens</i>) Slow growing spruce bluish color varies to dark green. Very hardy. Grows to 50 feet.</p>
<p>Norway Spruce (<i>Picea Abies</i>) Fast growing species with dark green needles often used as windbreaks. Gracious hanging branches looking like Cyprus, short needle length. 150 feet.</p>	<p>White Spruce (<i>Picea Glauca</i>) Hardy northern spruce with stiff bluish green needles. Symmetric growth. Short needle length. Grows to 50 feet.</p>
<p>White Cedar (<i>Thuja occidentalis, Arborvitae</i>) Soft, bright green needles. Very popular Christmas tree. Needs very little shearing. Medium growth up to 60 feet.</p>	<p>White Pine (<i>Pinus strobus</i>) Native five needle pine with a variety of uses: Timber, Christmas trees, windbreaks, wildlife habitat or ornamental. Fast grower. 80-100 feet.</p>
<p>Red Maple (<i>Acer Rubrum</i>) Grows well in moist bottom land. Excellent choice as ornamental green leaves in summer, scarlet red to bright gold fall foliage is a real eye stopper. Valuable lumber species. Medium growth to 120 feet.</p>	<p>Sugar Maple (<i>Acer Saccharnum</i>) AKA Hard Maple. Valued for many woodland projects. Great shade tree and valued for its syrup and lumber. Brilliant fall color. Fast growth to 70 feet.</p>
<p>American Elderberry (<i>Sambucus Canadensis</i>) Pinnately compound leaves. Large plumes of tiny flowers and masses of glossy black berries on red stems. Feeds a multitude of native birds. Fruit useful in medicines, wine and jam. Versatile shrub. Does best in full sun in nearly any soil type. Fast growth to 10-15 feet.</p>	<p>High Bush Cranberry (<i>Viburnum trilobum</i>) White flowers in flat clusters in May. Beautiful lustrous green leaves followed by scarlet red fruit and leaves in fall. Returning spring migrants rely on fermented fruit. Fast growth. 8-12 feet.</p>
<p>Nannyberry (<i>Viburnum lentago</i>) Open shrub to small tree. Creamy white bloom clusters in spring yield a plethora of food for wildlife in fall. Tolerates drought and shade, does well on most soil types. Fast growth. 20 feet.</p>	<p>Red Osier Dogwood (<i>Cornus Sericea</i>) Thick lustrous waxy green leaves, coral red stems, clusters of white flowers and masses of interesting purple white berries are a favorite of cedar wax wing, blue birds and many others as they pass thru on their southward migration. Great deer cover and browse. Fast growth. 8-15 feet.</p>
<p>Silky Dogwood (<i>Cornus Amomum</i>) Dense growing shrub with red/maroon bark in winter. Clusters of beautiful white blossoms followed by purple fall berries, a major food source for migrating birds. Excellent browse for deer and edge planting. Dark green waxy leaves. Serves as good screening shrub, quick to establish, thick growth! Fast growth. 9 feet.</p>	<p>Black Cherry (<i>Prunus Serotina</i>) Excellent ornamental with deep green leaves. Great food for wildlife and highly prized wood. Fruit used for preserves. Medium growth to 60-70 feet.</p>
<p>River Birch (<i>Betula Nigra</i>) Excellent ornamental tree, very heat and cold tolerant. Resistant to insects that plague the white birch. Quickly replacing white birch as a valuable landscape tree. Exfoliating cinnamon to light creamy white bark. Fast growth. 90 feet.</p>	<p>Swamp White Oak (<i>Quercus Bicolor</i>) One of the faster growing oaks. Forms large canopy, prefers moist sites with some drought tolerance will also thrive on upland sites too. Fast acorn production for food plot, preferred by wildlife because it lacks the tannins found in acorns of the black oak family. Medium to fast growth. 80-100 feet.</p>
<p>Common Milkweed (<i>Asclepias Syriaca</i>) Rough, weedy Wisconsin perennial which commonly occurs in fields, open woods, waste areas, roadsides and along the tracks throughout the Midwest. Great for butterfly gardens, meadows, prairies or naturalized plant areas. Beautiful pink/purple flowers attract hordes of Monarch butterflies and are critical to their life cycle.</p>	<p>Swamp Milkweed (<i>Asclepias Incarnata</i>) Native to swamps and wet meadows, easily grown in medium to wet soils, but is also tolerant of an average to well-drained soil. It is an erect, clump-forming perennial that typically grows 3-4' tall on branching stems. Flowers will attract pollinating insects and act as the primary food source for the larval stage of Monarch butterflies.</p>
